### Pass Closing By-law

At a meeting of the town council held on Monday, 14th inst., a by-law was passed authorizing the closing of streets and business places on Wednesday afternoon during the summer months. The following places are mentioned: conference hall, garage, feed and livery barn. Another by-law was passed prohibiting the unloading or loading of a vehicle or engine or power for washing and ironing. This will commence on Monday, the 21st inst.

### NOTICE TO ELECTRIC LIGHT AND POWER CONSUMERS

The electric light and power plant will be operated each week on Monday between the hours of 8 and 11 a. m. and Tuesday between the hours of 2 and 5 p. m. for the benefit of citizens using power for washing and ironing. This will commence on Monday, the 21st inst.

### Medical Men Form Association

A meeting of all the doctors from Didsbury and Airdrie was held at Dr. Clarke's residence on Tuesday evening, June 8th, to discuss the advisability of forming a district medical association. The feeling was unanimous that this should be done for the benefit of their own health, but also for the purpose of giving their patients the best of their combined knowledge.

While these district associations have been formed all over Ontario, this is the first to be formed in Alberta.

It was decided to name the District Medical Association and Dr. Harman of Olds was elected president, Dr. Whitlock of Didsbury vice president, Dr. J. L. Clarke of Didsbury secretary-treasurer.

Another meeting was held at Dr. Clarke's Monday night to further organization.

All the doctors at Olds, Didsbury, Airdrie and Camrose have joined the association.

### Republicans Nominate President Candidate

The big Republican national convention held in Chicago last week resulted in the nomination of Senator Warren G. Harding of Ohio, for president, and Governor Coolidge of Massachusetts, as vice president.

The final check up of votes showed 692 for Harding, 157 for Wood, 80 for Johnson and 12 for La Follette.

Johnson, the man who had been backing reactionary forces in the U. S. and whose name has been so strongly used by the Federal reserve, never had a show after the third ballot, nine ballots another being taken.

Harding is a hard shell republican of the McKinley type, according to reports, while Governor Coolidge of Massachusetts, has been largely in the public eye because of his action in suppressing the small state rebellion in Boston, started by the police in 1919.

Now who will be the Democratic nominee? Let's get it over with.

### Prohibition Campaign

The prohibition referendum campaign committee, with its headquarters in Edmonton, has been energetically developing its plans for the past few weeks with a view to securing as large a majority as possible in favor of the proposal to prohibit the importation of intoxicating liquors into the province for beverage purposes. Until very recently it was fully expected that the date for this vote would be a very early one, but as the vote is to be taken on June 16th on the new franchise bill which is now before the Federal Parliament and as the passing of this bill has been delayed very much beyond what was expected, the date has not yet been definitely announced and when it is, it will probably be later than expected.

The task of organizing the province, and getting the issue clearly before its more than 200,000 electors is, however, proving a big task, big enough to tax the resources of the provincial committee, and though they have favored an earlier date and they will need all the time they will be given them by the extension to thoroughly organize the province and secure the finance necessary to

## Agriculture

It is imperative that every agriculturist form a sound association with a progressive banking institution. This bank is stimulating production by providing a broad service for ambitious farmers. Any of our 400 branches can furnish reliable information as to markets and shipping facilities.

### A Great Institution

During the last week of May some forty or fifty editors of Saskatchewan newspapers assembled at the University of Saskatchewan for their fifth annual convention and second annual short course for editors. For several days each year Saskatchewan editors thus live in a University atmosphere, not only holding their meetings with in the college walls, but sleeping and eating in one of the student residence buildings and having placed at their disposal all the facilities of this institution of higher education.

What this means to the newspaper men it would be difficult to overestimate, and that the editors appreciate the opportunities thus afforded them was demonstrated by an attendance this year two and one-half times larger than a year ago. The assistance and encouragement thus given the press of Saskatchewan by the provincial university is bound to have a markedly beneficial effect as the years pass in the raising of the standard of journalism in the west.

Reciprocal benefits must likewise unquestionably accrue to the University by reason of the closer relationship and understanding of the press toward that institution. By being brought into these personal touch with the University and learning of and studying the many-sided activities of that institution, the editors are coming to more fully appreciate the really wonderful work it is carrying on and dividing in the interests of the people, and they will not be backward in bringing to the attention of the people the adventures to be obtained through a legal support of the University.

In the course of a brief address to the editors, preliminary to an inspection of the University plant and equipment, Dean Rutherford of the College of Agriculture, quoted some striking figures as indicative what the "education of farmers" now means to them and to the country in actual dollars and cents, apart from the decided advantages in other ways which the educated man possesses over the uneducated. He stated that as the result of comprehensive surveys made in a number of States to the south it had been ascertained that among farmers possessing equal means in the way of land, farm equipment and capital, the man with an education made a greater success than the man lack-

ing such equipment. Of farmers with equal opportunities in every respect, except in the matter of education, the following facts were established:

Those who attended the common school had a labor income for themselves of \$318.00 per annum.

Those who attended high school had a labor income of \$620.00.

Those who had attended college had a labor income of \$851.00.

A somewhat similar survey of Dundas County, Ontario, had revealed the fact that out of 100 farmers surveyed, 98 percent had no education except that obtained in the elementary school, notwithstanding the fact that there were four high schools in the county, thus demonstrating the regrettable fact that the boys who attended high school had not gone back to the farms.

Wise it is that the college educated boy makes such a greater success of farming than the one who lacks such training was revealed to the editors as they made their tour of inspection of the University. On one part of the University farm extensive experiments were being carried on to determine the value of crop rotation, and the best crops to follow each other. Other experiments had as their object the ascertaining of the best methods to prevent the blowing away of the soil, which is the cause of heavy losses annually when high prairie winds prevail. Elsewhere demonstrations were carried on to show the best type of horses, cattle, sheep and swine to breed in this country, and the nature of the crops which should be grown in connection with these types. In the well equipped farm mechanics building almost every modern piece of farm machinery of farm machinery was in evidence where the students were trained in the handling and repair of machinery with a view to securing maximum results from their use. Lastly, through the agency of the Better Farming Train, which was standing on the university grounds preparatory to starting out on its tour of the province, there was revealed the practical common-sense manner in which the university is carrying to the people far and wide the lessons learned as a result of the research work carried on at the university.

The University of Saskatchewan is unique among institutions of its kind that it embraces within the scope of its activities, not merely the arts and sciences, but everything that closely touches the lives and businesses of all classes of people, paying particular attention to the primary industries of the west, agriculture, whereas in most provinces and states agricultural instruction is quite separate and distinct from the universities.

The site of the University of Saskatchewan, consisting of 1600 acres, is beautifully located on the banks of the Saskatchewan River, overlooking the city of Saskatoon. The magnificent buildings are built of native stone, obtainable only a few miles away, and year by year additional buildings are erected. Over \$2,000,000 has already been expended, and the ultimate plan calls for the erection of a score or more handsome buildings and the expenditure of many more millions of dollars.

Ask for Minard's and take no other.

In Canada's 3,700,000 square miles there is room for the entire world's population, allowing nearly one and one-half acres for each person.

Empire Building by Air  
In the course of one year the ends of the British Empire have been reached by aircraft from England, the Atlantic has been spanned, and the journey of over five thousand miles from Cairo to the Cape has been accomplished. Twenty-five years ago and more it was the dream of Cecil Rhodes to build a railway from Cape Town to Cairo—but geography prevented it. The airplane has at last given reality to his dream. And dreams not only his. To reach Cairo by air, one passes over the Turkish Sea, and the straits to India lies above Palestine, where Isaiah saw the vision of the abiding Seraphim, and on through Assyria, where winged creatures adorn the palaces.

At the end of 1917 Germany had more than 53,000 women metal workers.

### New Settlers for Canada

First Contingent of the British-Canadian Farmers Land Syndicate

The tide of immigration that is now passing through Montreal to the Canadian West included the other day a sturdy group of young English and Scottish farmers, forming the first contingent of the British-Canadian Farmers Land Syndicate, an overseas organization which has secured large tracts of land in what is called the Spirit River settlement colony in Alberta. In the West each settler is assigned 160 acres, or a quarter-section of land, with the option of adding another 160 acres when the first tract has been improved. The district they were going to is situated about 500 miles northwest of Edmonton.

At the Yarmouth Y. M. C. A. Boys' Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sunburn, an immediate relief for colic and toothache. ALFRED STIKES, General Sec'y.

Advertising Bill for Recruits  
The amount of money spent in newspaper advertising for recruits to the C.E.F. in all Canada was \$45,184, according to a return tabled in the commons at the request of Joseph Archambault (Chamblay - Vercheres). Of this sum, \$42,739 went to English papers, and \$2,444 to French. In Quebec \$6,238 was paid to English papers and \$2,262 to French papers.

### After the Sea Lions

B. C. Fishermen Say One Will Eat 50 Pounds of Fish

A Day  
Large numbers of sea lions on the British Columbia coast, which destroy annually vast quantities of food fish may be slaughtered and their hides sent on the market to reduce the world's leather shortage. The proposal, first put forward by Premier Oliver, has the approval of many experienced fishermen. One Prince Rupert pioneer declared that with three companions he had killed 700 sea lions on the Queen Charlotte Islands in two days. The sea-lions, it is said, weigh from 2000 to 2500 pounds. The hides are nearly an inch in thickness and make a tough and durable leather such as is used in workmen's gloves and saddles. Fishermen declare that a sea-lion will eat fifty lbs. of fish in a day.

Minard's Liniment Lumberman's Friend.

Manitoba's Wheat Production  
The total value of Manitoba's 1919-1920 wheat crops is estimated at \$118,550,400. Last year the province had 2,013,000 acres sown to wheat, and the latest returns given show an average yield of 17 bushels to the acre.

### ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" is the thumb-print of genuine Aspirin. It positively identifies the only genuine Aspirin in the Aspirin proscribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package. There is only one Aspirin-Bayer-You must say "Bayer" Aspirin is the trade mark registered in Canada of Bayer-Monro-Mann-Whitaker of Baltimore, Md. While it is well known that Aspirin means Bayer, the public must be cautioned that the public must be cautioned that the Bayer Cross will be misapplied with their general trade mark, the "Bayer Cross".

WEDNESDAY, JUNE 16, 1920.

Enquiries respecting live stock los-  
ses have been sent to a large num-  
ber of farmers and crop reporters  
throughout the province. The re-  
plies indicate that the losses range  
from nothing at all in some districts  
to twenty five per cent in others.  
Department officials have made en-  
quiries while travelling throughout  
the country and from information re-  
ceived from all sources, the depart-  
ment concludes that the loss has been  
about ten per cent over the areas  
subject to feed shortage, that is,  
southern Alberta and parts of cen-  
tral Alberta, but on account of the  
steady reduction last summer of  
stock going into winter in loss areas  
and the consequent increase in the  
number in areas with sufficient feed  
the losses in relation to the whole  
cattle stock of the province would  
probably be not above seven or eight  
per cent. This does not include the  
loss in spring calves.

The situation with respect to horse  
stock is somewhat different. The  
dry season experienced in southern  
Alberta left the horses in a thin con-  
dition entering winter. Horses that  
had been accustomed to running out  
in previous winters were turned on  
ranges on which the areas was short  
and the water scarce. The winter  
closed down rapidly and much earlier  
than usual with the result that the  
horse stock suffered seriously during  
the first two months of winter. The  
death rate in the area mentioned has  
been considerably higher than usual.  
In the central and northern portions  
of the province there has not been  
any special loss in horses but on ac-  
count of the general feed shortage  
horses are thinner in flesh than usual.

The grass hopper plague is report-  
ed to have broken out over a wide  
territory both in Manitoba and San-  
katchewan, and it is also suspected  
that they have already entered Al-  
berta.

The oil spraying machine and as-  
phalt burners tried by Manitoba, are  
not a success, and the authorities are  
warning the farmers that a uniform  
prompt and thorough poisoning cam-  
paign is the only means of saving a  
big crop loss.

Watch for the hopper and go after  
him or he will make a hole in your  
pocket book.

## ELKTON SPORTS DAY

20 Miles west of Didsbury on the

Printed by Special Arrangements with The Allen.  
Toronto, Ont.

[Continued]

"Are you feeling some better, Ma?" he inquired gently.

"Yes, Boy, better. I'll soon be well."

He understood, and he held the lost hand, stretched out to him, in both his own.

"You're not quite as well as you was this morning," he said, hesitatingly; "I guess I know the reason."

She did not reply, but lay with her eyes closed, and Boy saw tears creep down the white cheek. He spoke fiercely.

"He threatened as I'd do it, and he did—"

He shook himself, biting the words off with a jerk of his white teeth.

"I know just what he told you, Ma. I know all he told you, and he didn't lie more. I haven't been to his school and I can't go to his school. I've tried my best to stay, 'cause I knowed you wanted me. But I go wild. I can't stay still inside like that and be in prison. It chokes me. I tell you. I don't want more learning than I have. I can read and write and figure. You taught me that, and I have learned from you 'cause—"

His voice faltered and feebly, the mother drew him down beside her on the bed.

"Poor old Boy," she smiled tenderly, smoothing the dark curls back from his forehead; then, more solemnly, "I wonder why you should have that for which so many people are striving?"

"Don't you—don't speak about it. You know we talked it over before. You called it enlightenment, you remember? I don't want enlightenment. I have it. I'll fight it away from me, and I'll have to fight it—and then."

He shouldered, and she held him tight in her weak arms.

"Dear Boy," she said, "it will be a useless struggle. You can't hope to hold your little world. Now go, and God bless you. Kiss me goodnight, Boy."

He bent and kissed her on the forehead, then springing up crossed the room. At the door he halted.

"Yes, Ma," he said gaily, in response to her call.

"Did you meet the teacher?"

One moment he vacillated between love and truth. Once he had lied unhesitatingly to save her. But he hated a lie. He went back to the bed slowly.

"Yes, I met him, and I told him that he best be leavin' these parts."

"Injun blood in you. But whatever you do, if you should happen to have a little nigger blood in you, don't tell 'em. Injuns naturally hate niggers."

"Bill got up and went in to say 'hello' to me. 'She wants to see you, nigger,' he says. 'I'll be there, nigger.'"

"When they thought the table again the tea and meat were stone cold. He smiled at the girl, who was standing beside the fireplace, and she said, teasingly:

"I told you you better not go."

The man with the fiddle across his knees stretched up at her words, and he looked over at Boy with a puzzled expression on his face.

"Thought maybe you'd joined a flock of woodcocks and gone south," he remarked. "Wonder you had the brain enough to get your meals. Wherever you been, Boy?"

"Nowhere much," answered the boy, looking hard at his plate.

"Well we had that teacher chop again tonight," said the father, —smiling fatter than."

Boy glanced up quickly and caught a gleam of humor in the speaker's eyes. Then he looked at the girl.

"The teacher says that you've been absentin' yourself from school," vent on the man. "I asked him if about the 'was a regular habit in scholars, same as swappin' jackknives, and you ought to have seen the look he gave me."

"It's a punishable offense," says he, "No, I don't mind you wholung. Boy says, 'I'm sure he needs it.'"

"I won't whip a big boy like him! I don't have to and I won't."

"Well I don't know as I blame you for not wantin' to," says I. "Boy's some handy with his fists, but a graduate in books of long Bill Fidler."

The big man stood up and stretched his six-foot two figure with enjoyment. In his huge fist the old fiddle looked like a hand mirror. He threw back his shaggy head and laughed so loudly that the burning log in the fireplace broke in twain and there was a shower of red and golden sparks up the wide chimney.

"When we were talkin' and I was coaxin' the visitor to set up to supper and make himself at home, who should drop in but Bill Fidler himself. Gosh, it was fun to see how he took in the teacher. 'Nice night, sir,' says Bill, hoonin' low and liftin' off his cap. I shook my head at him, but he didn't pay any attention, so I went on eatin' and let 'em alone. Bill got out his pipe and felt in all his pockets, kep' his eyes right on the teacher and grinatin' so foolish I nearly choked on a pork-rind."

"Would you mind obligein' me with a pinch of Canada-Green?" he asked. "I suppose you have a pinch of this in your pocket, sir?"

"The teacher frowned at him. 'I don't smoke Canada-Green,' says he short and crisp-like."

"Chaw, maybe," grinned Bill, but his pipe went away and kickin' his his expiratin'."

"No, but this—"

"Dear me," replied Bill, and after a while he says, "dear me" again.

"By and by Fidler lumbered up and told the teacher he was right down glad to meet a man fearless enough to come to this wild place in the canoe of travel."

"You're a martyr, sir," says Bill, a brave man, to come where so many dangers beset the path. Swamp fevers that wither you up, and ague that shakes you from teeth back where your back teeth are now, and your back teeth where your front ones should be. There are black snakes in these parts," says Bill, "that have got so used to bite Injuns they never miss a stroke, and they'll travel miles to get a whack at a white man, 'niggerly a stranger," says he. "Then there he wokes her like as two-years old, and she get hungry when the winter sets in."

"The teacher squirmed. 'I'll get used to all that,' says he."

"Sure," agreed Bill, "but just the same it's a good thing you're a brave and a lanky chap. Met any of our Injuns yet?"

"A few," said the young fellow, lookin' scared.

"Injuns are mighty queer reptiles," says Bill, "but you'll get along with 'em all right if you humor 'em with presents and attend their pow-wows. Might be a good idea to let on there's"

Her eyes rested upon him in mingled love and wonder.

"I don't like — I don't trust that man," said the mother earnestly.

"When you go, Boy, and God bless you."

"When they thought the table again the tea and meat were stone cold. He smiled at the girl, who was standing beside the fireplace, and she said, teasingly:

"I told you you better not go."

The man with the fiddle across his knees stretched up at her words, and he looked over at Boy with a puzzled expression on his face.

"Thought maybe you'd joined a flock of woodcocks and gone south," he remarked. "Wonder you had the brain enough to get your meals. Wherever you been, Boy?"

"Nowhere much," answered the boy, looking hard at his plate.

"Well we had that teacher chop again tonight," said the father, —smiling fatter than."

Boy glanced up quickly and caught a gleam of humor in the speaker's eyes. Then he looked at the girl.

"The teacher says that you've been absentin' yourself from school," vent on the man. "I asked him if about the 'was a regular habit in scholars, same as swappin' jackknives, and you ought to have seen the look he gave me."

"It's a punishable offense," says he, "No, I don't mind you wholung. Boy says, 'I'm sure he needs it.'"

"I won't whip a big boy like him! I don't have to and I won't."

"Well I don't know as I blame you for not wantin' to," says I. "Boy's some handy with his fists, but a graduate in books of long Bill Fidler."

The big man stood up and stretched his six-foot two figure with enjoyment. In his huge fist the old fiddle looked like a hand mirror. He threw back his shaggy head and laughed so loudly that the burning log in the fireplace broke in twain and there was a shower of red and golden sparks up the wide chimney.

"When we were talkin' and I was coaxin' the visitor to set up to supper and make himself at home, who should drop in but Bill Fidler himself. Gosh, it was fun to see how he took in the teacher. ### Advice to the Farmer

Gives of Advice To Farmers From The East.

A prominent "Farm" publication arriving from the east has these gems of advice to farmers.

"To be healthy one should spend considerable time in the open air every day without fail."

"Exercise enough to keep the muscles from getting soft and flabby."

"A heavy dinner in the middle of the day is inadvisable, as one may become sluggish later and be unable to concentrate on details requiring close attention."

"Live near to nature; take an interest in things out-of-doors; it provides a splendid tonic for the nerves."

### The Newspaper

Daily the newspaper lays before its readers something about most of the occurrences in its field. From sixty to seventy thousand words an issue have to be composed in order that the product of a news assembling organization may reach the homes of a city and its district.

The costs have become tremendous, yet the service is about the cheapest thing of value that the public can buy today."

—Ottawa Journal.

### Neither

The Baltimore American tells about a little girl who was astonished and appalled by a question the teacher asked her. The question was this: "Can you tell me whether you are an invertebrate or a neumatist?"

"Please Miss," she stammered, "I don't think I'm either. I'm a Moll's oist."

### MOTHER!

"California Syrup of Figs"  
Child's Best Laxative

Accept "California" Syrup of Figs only—Look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its sweet taste. All directions on each bottle. You must say "California."

The enjoyment of beautiful flowers is common to all the inhabitants of Japan. Even the humble laborer is a customer at the gardens where the flowers are kept for sale.

### SMOOTHEST REGULATOR FOR THE BOWELS IS HAMILTON'S PILLS

No Headache, Biliousness, Indigestion, or Sour Stomach, Where They Are Used

A FINE CONSTIPATION CURE They Cleanse the Liver and Move the Bowels While You Sleep

Take a ship in the night, your constipated headache and digestive troubles will disappear after using Dr. Hamilton's Pills.

They cure the worst cases, act quickly at night while you sleep, and give you next morning the freshest, briskest, happiest feeling you have known in many a day.

Hamilton's Pills will cheer up the most despondent sufferer.

They will make tired old folks feel like kids at play.

They overcome backache, sideache, liverache and stomachache, and kidney ache.

If they fail to do this you can have your money refunded. Fair enough, eh?

Don't stay sick or ailing! Use this grand family remedy at once. It will give you energy, spirits, ambition, appetite, good blood, better nerves—in short good health. You can get it in a 25c box of Dr. Hamilton's Pills. Sold by all dealers in medicines.

### May Adopt Torrens System

The suggestion was made and favorably considered in the Ontario Legislature for a change in the present system of land titles registration to something along the lines of the Torrens system as now employed satisfactorily in Manitoba, Alberta and Saskatchewan. A special committee was appointed to consider the matter.

### Farmers and Advertising

Farmers are learning the value of advertising and are large users of space in the advertising columns of local newspapers throughout the country. Auction sales lists are now found first in the papers and though bills are usually printed too, the ads in the local papers is found to be much more effective than the honored bills.—Walkerston Telescope.

As a rule a man's sugar-coated sweetness wears off with the waning of the honeymoon.

**Used for 70 Years**  
This is the same old cream that has remained until youth has become a memory. The soft, refined, creamy white appearance it renders leaves the face of beauty with you for many years.

**Gillette's Oriental Cream**  
This is the same old cream that has remained until youth has become a memory. The soft, refined, creamy white appearance it renders leaves the face of beauty with you for many years.

REDD, THOMPSON & SON, Montreal.

### PARA-SANI WRAPPER

Heavy, waxed paper in Household Rolls, with handsome oak Roller Box. Keeps sandwiches, cakes, cheese and butter fresh and wholesome. There is no messy mass of pickles and cake, tomato juice and sandwiches at the picnic if each article is wrapped in Para-Sani.

Para-Sani is also good for household uses. It keeps bread fresh and moist until eaten. It protects meat and butter from contamination of flies, bad air or germs. It is good for lining cake tins or for polishing irons. Para-Sani will save many times its cost by preventing waste.

Para-Sani sent prepaid on receipt of Price or C.O.D.  
4lb. Roll with Roller Box, \$2.50  
3lb. Roll without Box, 1.50  
4lb. Roll without Box, 1.50  
3lb. Roll without Box, 1.50  
2lb. Roll without Box, 1.50

Cheaper and more convenient than waxed paper in sheets, and the paper is of better quality. Ask your Dealer.

### APPLEFORD COUNTER CHECK BOOK CO., LTD.

175 McDermott Ave. East - WINNIPEG, Man.

**MURINE'S**  
Rests, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tingle, Smart, Itch, or Burn, it Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At All Druggists in Canada. Write for Free Eye Book. Marine Company, Chicago, U.S.A.

# Discuss Value of Good Roads as An Aid to Agriculture

Winnipeg.—The value of good roads as an aid to agriculture, as a factor in the development of the country and as an inducement to tourist traffic, were some of the topics, apart from the professional and technical uses that were discussed at the two sessions of the Canadian good roads convention here.

Hon. F. C. Biggs, minister of public works, Ontario, declaring that the best way to increase production was to keep the boys on the farms, said that they had come to realize in the eastern province that they must have improved roads for bringing the boys to the consolidated schools and continuation schools, they were providing so that the children on the farms would not have to travel to the towns to obtain the education required to fit them for life's work.

Herbert Culbert, executive secretary of the Pacific Northwest Tourist association, asserted that one million dollars would be spent in Canada each year by American tourists if the Dominion possessed a national highway.

A. P. Sandles, secretary of the National Crustless Stone Association, of Columbus, Ohio, asserted that there had been a reaction on the rates on road building and Mr. Biggs, commenting on these freight charges, observed that he could see no reason or common sense on the part of the Dominion government, if, after giving a grant to improve roads construction they would permit the railways to increase the freight rate on stone.

## Japan Suspects Plot

Negotiations for Buffer Siberian State Are All Off

Honolulu.—Japan has broken off negotiations with the Russian Bolsheviks for the formation of a buffer state in Siberia, according to a Tokyo cable to the Nippon Jiji, a Japanese newspaper here.

The breach in negotiations came about as a result of Japan's discovery of a plot to undermine General Semenov, commander of the Siberian forces in Siberia, and bring the Baikal region under the Bolsheviks, the cable stated.

## Safeguard Interests in Persia

London.—In reply to a question in the house of commons regarding the Bolshevik activity in Persia, Cecil B. Harmsworth, minister for foreign affairs, said the Persian minister in London had been in constant touch with the British foreign office, and a complete understanding had been reached that both Persian and British interests would be safeguarded.

## She Says She Can Now Do Her Work

MRS. M. MAGNANT GIVES THE CREDIT TO DODD'S KIDNEY PILLS

Her Back Ached and She was Always Tired, But She States She Found The Relief She Longed For in Dodd's Kidney Pills.

St. Line, Alta., June 7th.—(Special).—"Thanks to Dodd's Kidney Pills I can now do my work." So says Mrs. M. Magnant, a well known and highly respected resident of this place. Mrs. Magnant was a sufferer from that terrible weariness so many women know.

"My back ached," she says, "and I felt so tired all the time." But she used Dodd's Kidney Pills. She persevered with them, taking sixteen boxes in all, with the result given in the glad words of the opening paragraph.

Other women in all parts of Canada make the same statement. They were weighed down with weariness, weakness and pain, and found the relief they longed for in Dodd's Kidney Pills. For sick kidneys are the cause of the great majority of the ills from which women suffer. To treat them the kidneys must be strengthened so they will strain all the impurities out of the blood.

Ask your neighbors if Dodd's Kidney Pills do not help sick kidneys.

## Budget in Committee

Luxury Tax Will Likely be Subjected To Some Changes

Ottawa.—The formal budget debate out of the way, consideration of the budget resolution in committee will open with the least possible delay. Here, in all probability discussion will be protracted, covering possibly a week or so. Provisions made in regard to income tax and business profits are expected to go through without a doubt.

The luxury taxes will be subjected to some changes, it is thought, particularly with a view to making their administration more workable. Since the budget was brought down the minister of finance has been in constant receipt of representations with regard to the luxury taxes and the sales tax. Important points have been brought up and notice will not be taken of some of the suggestions. In addition to any amendments which the finance minister may propose, it is likely that a number will be submitted by members of the opposition.

## Some Profit in Clothing

Farmer Sold Wool For Fifty Suits and Got One With the Price

Toronto.—The Globe published the following despatch from Hickman, Ky.:

Roy Shaw, a well-known farmer living near Hickman, took 200 pounds of wool to Hickman the other day, where he sold for 30 cents a pound, or for \$60.00. Then he purchased a suit of clothes for his son, and found that the money he received for the wool was just enough to pay for the suit. He says there are about four pounds of wool in a suit of clothes, and on that basis the wool he sold will make fifty suits, which is sold at \$90 a suit, would bring the seller \$4,500. Allowing one-half for labor and other materials going into the suit, somebody will get a return of \$1,500 on a \$60 investment, he figures.

## Respect Wishes of Canada

Do Not Consider it Advisable to Publish Correspondence

London.—In the house of commons recently the colonial under-secretary of state said it had been agreed by the British and Canadian governments that it would be inadvisable to publish at present the correspondence regarding the appointment of a Canadian representative at Washington. Percy Burrell and Sir Richard Cooper demanded somewhat at this answer but Andrew Bonar Law said that the British government must consider also the desires of the Canadian government in such matters.

## Rain Eats Forest Fires

St. John, N. B.—Heavy rains in Northern New Brunswick and other districts put an end to the menace of many fires. Two new fires were reported near Newcastle, and another on the southwest Miramichi, but they are under control. Situation in Victoria and Midwestern counties is much improved. The fire at Glenora on the Fredericton and Grand Trunk railway in Sarnia county, has burned about 1,200 acres.

## Yukon Free of Ice

Dawson, Y. T.—The Yukon River is now entirely free from ice from Lake Laberge northward. Advice from interior Alaska say all restrictions there against travel because of influenza are being lifted as there have been no new cases in the last 13 days. The first arrivals from Mayo Camp bring highly favorable reports of silver prospects in the Keno Hill district.

## Continue Wheat

Standards in U.S.

Reduction Urged Would Decrease Return to Farmers

Washington.—Continuation of the present federal wheat standards was decided upon by Secretary Muesel in an opinion covering hearings held to inquire into dissatisfaction in the central northwest with existing grades for hard red spring and durum wheat. Request for lowering the present standards, the secretary announced would tend to decrease the return to farmers while advocates of the change argued that the producer would receive more money for his wheat.

The federal standards established in 1917 and revised in 1918 have been operative only under fixed price and war conditions, the secretary stated, adding that opportunity for fair tests of their merits or defects have not been afforded under normal marketing conditions.

## Bid Sir Thos. Lipton Good Luck

Starts For America in Quest of the Cup With His Boat Shamrock IV.

London.—Crowds of people were at the station to wish Sir Thomas Lipton bon voyage and good luck in his quest for the American cup, with his boat Shamrock IV, against either the Rialto or the Vandalia. Dorey, Queen Alexandra, in expressing her hopes that Sir Thomas would win with the Shamrock IV, said: "Certainly I am confident, but I am glad I am not too sure for then there would be no sport for anyone."

## No Military Compulsion

Signing of Peace Treaty Has Rescinded Conscription In Germany

Berlin.—It is semi-officially announced that it will be enacted abolishing compulsory military service which is demanded by the peace treaty, because the national assembly's acceptance of the treaty automatically rescinds the former compulsory regulations. This decision has been issued in view of the allegations that Germany is not carrying out the provisions of the treaty.

It is also announced that the minister of defence will issue a decree forbidding discharged soldiers to carry service rifles and hand grenades.

This order is somewhat belated, as according to reports, thousands of discharged men all over the country are in possession of their full army outfits. A few days ago the police seized near Hanover, 194 hidden rifles and 190 saws and 10,000 cartridges.

## Geddes Given Honorary Degree

Washington.—George Washington University, at its ninety-ninth annual commencement exercises conferred the honorary degree of Doctor of Laws on Sir Auckland Geddes, ambassador to the United States. Ambassador Geddes delivered the commencement address.

## SNUFFS CUT A COLD IN A FEW MOMENTS

Cleares The Nostrils, Stops Sneezing Heals the Throat Quickly

Catarrhazone Works Wonders

Lots of people used to let their colds "work off" and then, when the whole lot, sneezed around the house, all the whole family finally caught the infection.

Nowadays colds are cured by Catarrhazone before they really get a good start. This healing vapor, full of pure eucalypti, gives instant relief. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely sure for Catarrh, and in throat trouble it works like a charm. Catarrhazone is a permanent cure for bronchitis and throat trouble. Not an experiment, but a cure that's guaranteed. Get "Catarrhazone" today, and beware of substitutes. The dollar outfit guarantees instant relief, size 50c; trial size 25c, at all dealers.

# Want Government To Control Wheat For Another Year

## The Newsprint Situation

Sir Henry Drayton Tells Manufacturers Government Will Insist On Domestic Supply

Ottawa.—The conference with the newsprint manufacturers announced in the house took place in the finance minister's office. Sir Henry Drayton told the manufacturers that the government was much disturbed to find that, knowing the agreements made last fall, twenty-five percent of the daily newspapers in Canada were facing the prospect of suspension owing to inability to get newsprint paper, although willing to pay current prices for export to foreign countries. He said the government would insist upon the domestic requirements being supplied as they represent only 15 percent of the total production.

The situation is still regarded as very serious. The publishers are emphasizing the point that the total amount of newsprint necessary to the continued existence of the 26 daily newspapers affected represents less than two percent of the exports of newsprint and that they ask for no favors regarding price.

The publishers state that the great majority of the mills are keeping their Canadian customers supplied, and that the present crisis has been caused by the attitude of a very small minority.

The Hearst newspapers also had a representative in Ottawa, interviewing the government regarding newsprint supplies. It is said that the consumption of newsprint of the Hearst papers is 200,000 tons, a substantial portion of which is made in Canada.

## Will Open Office in London

Cabinet Grants Permission to Soviet Government

London.—As the first result of the meeting of George Kravinsky, Russian Bolshevik minister of trade and commerce with Premier Lloyd George and members of the British cabinet, the soviet government, according to the Evening Standard, has been granted permission to open immediately a central trading office in London. At this office, the soviet government, an endeavor will be made to organize an exchange of goods with British traders.

## Troops Are Gathering

Sensational Reports of Concentration Of Bavarian Forces Comes From Potsdam

Berlin.—The Tagblatt publishes under reserve sensational reports of the concentration of Bavarian troops in the neighborhood of Potsdam, and that Prince August Wilhelm, of Prussia, son of the former emperor, is playing a prominent part in the movement. It also publishes a rumor that the authorities intend in future to arrest all radicals and a number of prominent leftists.

## Shortage of Laborers in West

Calgary, Alta.—That the west would absorb at least 20,000 men for railway construction, farm work and mining, was the statement made by Grant Hall, vice president of the Canadian Pacific Railway, in the course of an interview here.

D. C. Coleman, vice president of western lines, who was also present, confirmed this great shortage. They stated that there was a scarcity of skilled labor in the west today, also, but not to the same extent as in western Canada.

## Chief of Police

St. Paul, Minn.—Thomas E. Campbell, for three years chief special agent in the Minnesota bureau of investigation, department of justice, has accepted the post of chief of police at St. Paul, effective June 6.

## Winnipeg—Asserting that the Canadian Wheat Board cannot exercise control over the 1920 crop unless its authority is renewed at the present session of parliament, the executive committee of the Canadian Council of Agriculture telegraphed the Dominion government, urging that steps be taken to have government control of the wheat crop for at least another year.

The resolution as forwarded to Ottawa, recalls a resolution of the council of agriculture adopted last January, favoring government control of the wheat crop of 1920-21, provided that "control of buying should be discontinued on the part of overseas importers of Canadian wheat," points out that the conventions of Alberta, Saskatchewan and Manitoba organized farmers subsequently approved of this resolution and asserts that "there is no indication of the lifting of government control of buying for foreign export, as to affect the marketing of the next crop." The resolution continues, "Whereas the present Canadian Wheat Board exists under and in virtue of the provisions of the War Measures Act and cannot exercise its power over wheat grown in Canada in 1920 unless its existence is continued for another year by an act of parliament at the present session."

"Therefore the Canadian Council of Agriculture would strongly urge the government, before prorogation of the parliament this session, to take the necessary steps to have the powers of the Canadian Wheat Board continued for at least another year."

The Death Warrant Delivered  
No defence can be offered when you apply Putnam's to sore corns—the offender has to die. Nothing so certain as to quickly cure corns as Putnam's Corn and Wart Extractor; try Putnam's, it's free from acids, and painless. 25c. bottles sold by all dealers.

## Weather Aids Wheat Crop

Brandon.—The rains and cold weather of the past few days have been of immense benefit to the crop in the Brandon district. One week ago, due to the dust storm, many fields looked brown and bare. Today everything is green and the roots of the wheat are driving deep down in the earth, making for a vigorous and sturdy growth and a promise of ability to withstand drought, should there be one at a later date.

Thursday, choir practice,  
8 p. m.

#### Highland News

Ben Lackhouse and Fred Admussen of Highland are pitting in their  
crip in Bergen.

Fred Admussen has bought a drove  
of horses east of Didsbury. Compe-  
tition will now be keen as grandpa  
has about twenty head.

Martin is very busy these days on  
the clearing.  
Well. Would you believe it? Big  
Prairie was telling Elton that they  
have a new baseball outfit consisting  
of suits, hats, balls, broad pad and  
mask, and they are beauties. They  
say the outfit cost them nearly  
forty dollars. How about Clements  
of Didsbury who gave \$25 for a catch-  
er's mitt?

The score between Elton and Big  
Prairie read something like this:  
Big Prairie 3, Elton 26. Elton is  
now ready for Didsbury.

Kyle Oliver says his old bus is good  
for a dozen any old time.

Of course we are not telling what  
country he came from, but a hired  
man near here told his boss that he  
could not drive the blooming 'buses  
and old the cills at the same time.  
He was using a walking plow.

### The Wallis

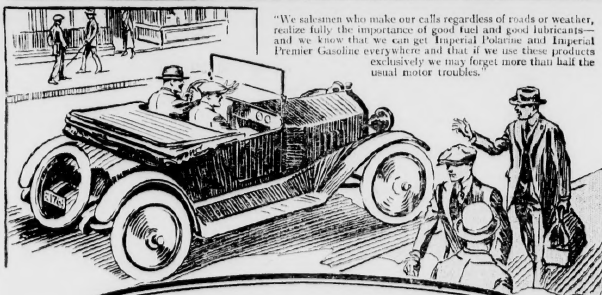

AMERICA'S FOREMOST TRACTOR

If you anticipate getting a tractor call and let us  
show you specifications of THE WALLIS TRACTOR--  
Absolutely Closed in, Free From Dust, consequent long  
life and minimum of trouble to the farmer. This is im-  
portant as this season will be short and farmers need  
service.

A real snap in a used FORD CAR.

J. VENUS, Manager.

Phone 58.

"We salesmen who make our calls regardless of roads or weather,  
realize fully the importance of good fuel and good lubricants--  
and we know that we can get Imperial Polarine and Imperial  
Grease Gasoline everywhere and that if we use these products  
exclusively we may forget more than half the  
usual motor troubles."

### 365 Days a Year Service

ALL motorists, especially those who use their cars for business  
purposes, must have steady service. They soon learn that correct  
lubrication is vitally important to uninterrupted service and that  
Imperial Polarine gives adequate thorough lubrication.

Imperial Polarine keeps the engine running smoothly and quietly by  
establishing and maintaining a perfect piston-to-cylinder seal, which  
holds all the power of the fuel charge behind the piston.

Imperial Polarine thoroughly lubricates and cushions every rubbing  
surface with a wear-resisting oil film. When used exclusively break-  
downs are infrequent, depreciation is low, fuel costs reduced.

One of the three grades described below is specially suited to your  
motor. Look for the Imperial Polarine Chart of Recommendations  
where you buy your oil and learn which grade to use.

Imperial Polarine is sold in one and four-gallon sealed cans, steel 12 1/2-  
gallon kegs, steel half-barrels and barrels, by dealers everywhere.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)

Power - Heat - Light - Lubrication  
Branches in all Cities

### A FAIR, SQUARE MOTTO TO ALWAYS REMEMBER

Patronize a home industry that is building up and develop-  
ing what is absolutely sure to increase the value of your  
farm properties.

This you can accomplish by always bringing us your milk,  
sweet or sour cream, or eggs; in fact, any produce you  
have to sell. We can get you the best market. Our  
market for good sweet cream, which will bring you the  
highest price is unlimited.

We have the facilities to freeze it after you deliver it.

When continually patronizing us you have the advantage  
of selling either the whole milk, fresh sweet cream or sour  
cream, whichever will bring you the most dollars.

We ask your support and co-operation. Dairymen, our  
business is open for your inspection, from start to finish.

Come in and have a visit and see what we are planning to  
do for you.

## Vanderhoof Has A Future

Bright Prospects Ahead of the Nechako Valley District

A thriving Columbia town that has a very bright future before it is Vanderhoof. Situated in the Nechako Valley on the Grand Trunk Pacific railway, midway between Edmonton and Prince Rupert, it is the centre of a fine agricultural district, eminently suitable for mixed farming. The soil in the Vanderhoof district is almost inexhaustible and is easy to clear. The land in the Nechako Valley produces wonderful crops of grain and timothy hay, as well as fine vegetables. Settlers are fast filling up the country, and the Soldiers' Settlement board has placed a number of returned men on the land. The government is establishing a cannery at Vanderhoof, and undoubtedly it will become the centre of a great dairying district. Much of the land is suitable for steam plowing and the timbered area furnishes good shelter for stock. Sheep raising and mixed farming generally will prove very profitable.

There is fine fishing and good hunting close at hand, mineral wealth in the district, and a pleasant and mild climate.

## Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills accustom these organs to activity they thoroughly cure indigestion and overcome the many annoying symptoms.

**Dr. Chase's Kidney-Liver Pills**

## Alfalfa Cultivators

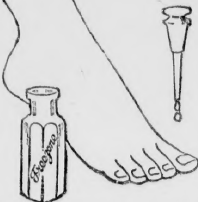

Proper Methods to Follow in Order To Enlarge Success

Alfalfa may be sown with a nurse crop in parts with a good rainfall if the seedling down is done on land that is not more than one crop from having been summer-fallowed. A light seedling of about a bushel of barley or a bushel and a peck of oats per acre is heavy enough seeding for a nurse crop. In the drier sections of the province and on land that has not been summer-fallowed recently in the winter sections, seedling without a nurse crop will give much better results. When seeding with a nurse crop the alfalfa should be sown at the same time as the nurse crop. When seeding alfalfa alone, the land if in summer-fallow or hood crop the previous year, should be top worked until about the first of June and may then be seeded. Subtle should be full plowed and top worked in the spring until June and then seeded. Fifteen pounds per acre is the usual rate of seeding.

Northern grown alfalfa seed of the Graham, Turkestan or Baltic varieties must be used, Grimm being better than either of the other two. Before sowing the land or the seed must be inoculated with alfalfa micro culture unless the land has grown alfalfa or sweet clover previously. Of the two methods, inoculation of the seed is usually easier, and gives good results. If these two precautions are taken the first steps necessary to success are assured—N. D. McKenzie, Sept. Indian Head Experimental Farm.

## Lift off Corns!

Doesn't hurt a bit and Frezzone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from between the toes. A tiny bottle of "Frezzone" costs little at any drug store; apply a few drops on the corn or callus. Instantly it stops hurting; then shortly you lift that bothersome corn or callus off, root and all, without one bit of pain or soreness. Truly! No humbug!

## Americans Interested in Western Lands

New York Financial Houses Investigate Lettbridge Irrigation Project

Investigation of the Lettbridge Northern Irrigation Project by two New York financial houses of high standing, will be undertaken in the immediate future with a view to purchasing the lands of the irrigation district. It was asserted by J. M. Roberts, a leading barrister, on his return to Calgary from New York. Mr. Roberts, who some time ago obtained an open option for the purchase of the lands, went to New York in this connection. He anticipates that the inquiry into the irrigation undertaking by engineers sent out by the financial houses will take place in June. The terms of his option are not such as to interfere with the right of the irrigation district to make any other arrangements for the sale of the lands which they may desire, and in the event of a definite offer being made the district will have the right to accept or refuse.

## New Building Material

Experiments are being carried on in building houses from marble dust and sawdust at Vancouver. It has been claimed that the cost of the house in construction will be six cents a foot in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

W. N. U. 1319

## Strangers to Truth

The preacher announced that next Sunday his subject would be "Liars" and that he would be very glad if during the week they would read the 17th chapter of Romans for themselves.

The next Sunday the preacher commenced by reminding his hearers of the request he had made, and asked all those who had read the 17th chapter of Romans to stand up. To his astonishment half the congregation stood up.

"Thank you very much" said the preacher, "now it is to you I want to speak today, because there is no 17th chapter of Romans!"

## NOURISHING FOOD AND GOOD HOURS

Help You To Resist Disease — Aid These With a Tonic to Keep The Blood Pure

The power of your body to resist disease and to fight it after disease gets a foothold, is one of the most precious possessions you have. You weaken this power when you let your general health run down, your blood gets thin and your nerves unsteady.

You weaken it when you worry, when you overwork, when you do not get sufficient sleep, and when you are under-nourished, either because you do not eat the right kind of food or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen resistance to disease when you build up your blood and nerves by the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiates and harmful drugs of any kind. The value of these pills as a health builder is fully shown by the experience of Mrs. E. C. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was in a much run down condition, suffering from many of the well known symptoms of anaemia. My mother procured a supply of Dr. Williams' Pink Pills and after taking about half a dozen boxes I was restored to normal health. Again after my marriage, and before my boy was born, I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My latest experience with these pills was following an attack of pleurisy, which left me completely listless in health. Part of the time I was under the care of two doctors, and for three months I was practically between life and death. Again at my mother's suggestion I started the use of Dr. Williams' Pink Pills. I had not been taking them long before I could tell that they were helping me. Day by day I could feel my strength returning, and was soon enjoying good health once more. In view of all my experience I think I can only say there is nothing in the world so good for me as Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all leading druggists or by mail at 50 cents a box or six boxes for \$2.50 each. The Dr. Williams' Medicine Co., Brockton, Mass., U.S.A.

In Japan practically all women except a few informed old slaves wear shoes.

## DANDERINE PUTS BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter—to freshen your scalp, check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

## Bee Culture is Profitable in Alberta

Edmonton-Apiarist Proves That Bee-Keeping is Profitable

Bees have proved themselves not only adaptable to the climate of Western Canada, but very profitable to raise as a side line, and as an example of this, the experience of Mr. Wensel, of Edmonton, may be given. Mr. Wensel has been keeping bees for the last six years. The returns he has obtained from them go to show that they can be reared economically, and that the honey produced is fully equal to any of the imported variety.

Mr. Wensel started with a foundation swarm of mixed bees. By using only well bred queens, which he imported from Tennessee, he managed, within a few years to so improve his swarm that he had an almost pure strain of Italian bees. He keeps from ten to fifteen hives of bees, disposing of the increase in the spring or fall.

From the standpoint of profit and profligence, bees can hardly be equaled by any other member of the animal or insect family producing food for human consumption. In the spring of 1918 Mr. Wensel had nine hives, three of which were in very poor condition. During the summer the nine hives increased to 21, and honey produced, less the amount left for winter feed, was eight hundred and twenty-seven pounds. The honey sells at from 35 to 40 cents per pound. In 1918 the record of production from the apiary was 100 lbs. per hive, or, at 40 cents per pound, \$40 worth of honey per hive.

Bees require very little attention in Western Canada. With a clover or alfalfa field in the neighborhood and supplied with sufficient comb and suitable hives, they will practically look after themselves for the whole summer. In the fall the hives containing the bees are either stored in a cellar or left out in the open. If the bees are left outside, a box large enough to cover the hive and leave a space of about four inches on all sides is put over the hive, and the space filled with chaff. An opening, however, is always provided. It has been found that when the hive is plugged up the bees will come to where the opening is and work until they die in their attempt to get out. On the other hand, when there is an opening they never go out unless on very bright sunny days.

Mr. Wensel's experience goes to show that it is better to winter the bees outside. They are not only more active and start to work earlier in the spring, but seem to be in far better health. However, if the bees are kept in a cellar over the winter it has been found best to take them out about April first.

Bees come out and are ready to start their season's work as soon as the warm weather begins. The hives are then changed out and the frames and combs put into place. From then on they require no attention until they start to swarm towards the end of May or the beginning of June. Between this swarm of the season, if put in a hive of its own, may hatch out a second swarm. One season one of Mr. Wensel's swarms that were hatched in June produced 99 pounds of honey the same season.

It is the practice to take out some honey and put on a super with a queen excluded to induce honey production about the end of July. To September, all except 35 or 40 pounds of honey, which is left as winter feed, is taken out and the hives prepared for winter.

Keep Minard's Liniment in the house.

## Age of the Earth

How old the earth is can only be guessed, and it would be a bold man who would say what the best figures are save the man who puts them out. In 1860 John Phillips estimated the age of the earth at between 38,000,000 and 96,000,000 years. Considerable difference in one man's figures. C. D. Walcott considered 70,000,000 as the maximum age. George H. Darwin has discussed the age of the earth from a purely astronomical point of view. From his theory of the earth-moon system he arrived at an estimate of more than 66,000,000 years.

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

## TO WOMEN OF MIDDLE AGE

This Woman's Letter Tells You How To Pass The Crisis Safely.

Lancelotti, P.Q.—"During the Change of Life I felt so weak and run down I could hardly do my work. The perspiration would pour over my face so that I couldn't see what I was doing. We live on a farm, so there is lots to do, but many who felt as I did would have been in bed. I took Lydia E. Pinkham's Vegetable Compound, and it did me a world of good. I tried other remedies but I put Vegetable Compound ahead of them all, and I tell every one I know how much good it has done me."—Mrs. JENNAN BROWN, Lancelotti, Prov. Quebec.  
Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ear, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness should be heeded by middle-aged women, and let Lydia E. Pinkham's Vegetable Compound carry them safely through this crisis as it did Mrs. Brown.

You are invited to write for free advice  
No other medicine has been so successful in relieving women's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass.

**NORTH END LUMBERYARD, Ltd.**

**J. BENSON, Manager.**

**DIDSBURY, - - - ALBERTA.**

A great many residents of the district will remember Bill O'Donnel, who with the late Tom Birchall, who was killed at the war, ran a big ranch west of town. Mr. O'Donnel, a settler in the district, having arrived here on Saturday last. He has only

just been released from hospital at Toronto after spending six months under treatment for wounds caused by the war. Bill has a little thinner and older, but he has the same old optimistic outlook, which does one good to meet him.

## AROUND THE TOWN

Don't forget—all business places are closed on Wednesday afternoons in Didsbury.

Mr. and Mrs. Aloys Schmidt left on Saturday for their new home at Salmon Arm, B.C.

There will be a church and Sunday school picnic on the church grounds at Westerdale, Wednesday, June 14. Geo. Harrison, Master of King Hill Lodge, A.P. & A.M., attended the grand lodge meeting of the Masons order held at Banff last week.

The kiddies of grade six are trying their exams this week so that their room may be used for high school exams which start next week.

The meeting of the St. Elizabeth's Women's Institute will be postponed to allow the members to attend the Rugby Women's Institute picnic at Mrs. Chas. Brown's.

The Olds town council has published a notice that a bylaw has been passed closing all places of business at 12 o'clock noon on Wednesday through the summer months.

Have you noticed the beautiful appearance of the honeysuckle? Some dandelion crop eh? Not much as trying to keep lawns free from this noxious weed which they are allowed to grow so freely on the roadside.

Ten tenders are to be called for the erection of a substantial telephone building in Didsbury. It is expected that the building will be completed this summer. The present building used for telephone purposes for so long, should be put on a lot and exhibited as a specimen of what construction people had to do business under in the dark ages.

The death of Mr. John Albert Freeman, father of Mr. E. E. Freeman, who he was living at the time of his death, took place on Friday evening last, the remains being taken to High River, his home, for interment.

A peculiar coincidence is the fact that Mr. Freeman, sen., came to Didsbury when he first came west seventeen years ago, but finally settled in High River, his son went into business here a few years ago and Mr. Freeman came back to his first location and died here.

## The Supercynic

(Written especially for the Pioneer.)

I despise a cad, I despise a coward, I despise a cynic. There is nothing so disgusting on God's card as one of all of these things. They are generally banished, uncommunicated, isolated, or any other term in a good dictionary. They are relegated into the category of creatures whose function is to annoy.

The slier day I met a cynic, a cold, sour, narrow, up-to-date sample who, from the time I met him did nothing but serve up a dish and dish of cynicism. He rioted in a very gluttony of cynicism. He talked on the British government, and the Canadian government, and the American government. He cursed the profiteers, and the budget, and the high cost of living. He refused to keep his hob nailed tongue off the country, its citizens or its climate.

At first I grew seriously alarmed over the health of the cynic. I feared he would ultimately become a raving maniac and batter my few brains out with a willow. But I might have saved myself the trouble of being in my way spent by his intoxicated and muddled harangue, for cynics don't is a rule go mad.

Then a curious thing happened. He seemed to dry out of a sudden. Not another drop of cynicism came on. Evidently he had touched bottom. It was then I was turned to open my mouth and speak. The kind of exception I might get was not clearly defined to my own mind. The cynic's 'sawney' might be inspired to blow a withering blast of scorn into my ears for all I know, still I was determined to have a try. What a very wonderful sky that is! I ventured. That is the most peculiar and amazing sky I have ever seen. No where else at great altitudes do clouds like these form.

At this the eyes of the cynic left the ground and looked into the wide open vault above. As he gazed upon the work of that hidden builder—who out of no visible thing was piling up visible things in huge and beautiful and fantastic shapes—the cynic's sneer gradually began to fade from his face and he crystal stare of his eyes replaced by a new well-nighness.

As we walked I said: "This country beats all for sunshine and great open spaces and great freedom. A man can walk almost anywhere and nobody question his going."

The cynic replied with a natural affirmation which but good of me on in my crusade. For the cynic of Mike, said I, there is the first of the year. He put forth his hand and placed it, placing it in the buttonhole of his coat. It has a sweet and intoxicating odor," he exclaimed.

"I don't believe there is a human being alive who does not feel better or smell a rose," I remarked. "I don't know of another flower that has the power to awaken past memories like the rose. It is the sweetest and sweetest of all flowers."

He could not keep his nose out of my nose. We walked along, and he said so I was convinced from the way he shook my hand, and from the warm smile that transfigured his face, that a great calm had possessed his soul.

Would rather be a silly sentimentalist any day than a cynic.
